/ Biography

Rapha MEY (b. 1971) is a french-american digital artist based in New York City with a background in web development and design.

Experimenting with code since the days of Net Art, his practice focuses on real-time 2D and 3D experiences developed for the browser, often conceived as slow, meditative environments that unfold over extended durations. Through algorithms and controlled randomness, these systems produce varied outcomes while maintaining a coherent and recognizable visual language.

Rapha's work also engages with questions of digital provenance, using the Bitcoin blockchain as a kind of shared memory bank to store personal data since 2018, alongside explorations of concrete and generative poetry that combine the spatial and affective dimensions of language.

His work has been exhibited internationally.

/ Solo Shows

2025

Oct-Nov - TRANSITIONS
Colonna Contemporary - Philadelphia, PA

/ Group Shows

2026

Feb - MIRADAS TANGENTES
ArtLab - Madrid, Spain

2025

Oct - ARROYO BLOSSOM
ArtBlocks - Marfa, TX

Aug - TRYPTICH
RGB_MTL - Montreal, Canada

Aug - BEACONS
BTC Summit - Hong Kong

Feb - The Book of Change
Assembly Winter conference - Helsinki, Finland

Feb - PENUMBRA
NFT Paris conference - Paris, France

2024

Aug - Text Me!
Seattle Museum - Seattle,

Apr - Field Trip
BEEPLE Studios - Charleston, SC

/ Artist Statement

I write code. That's a really bizzare way to make art, when you could pick up a pencil, a brush, Photoshop, or carve away a block of marble.

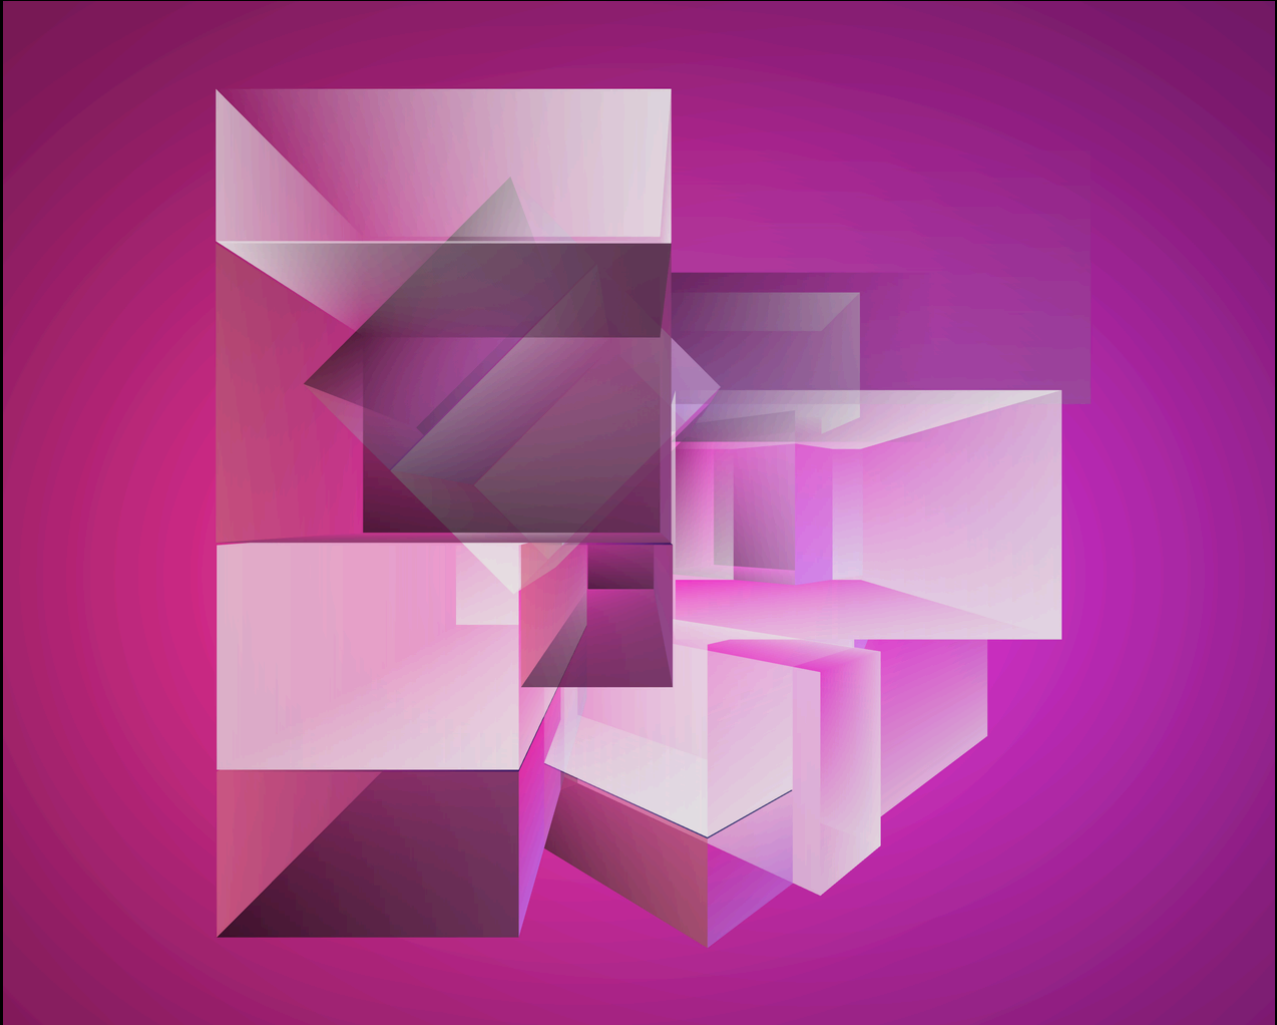

Instead, I carve strings of keywords together and watch the result appear on screen. I've been fascinated with this process for years : the machine doesn't do what you want, it only does what you tell it to do. And believe me, there's usually a big difference between the two!

So what do I tell the machine to do? I can draw 50 squares by hand, but I can't draw 50,000 squares. So that's what I ask: do something that I cannot. Repeat a shape a million times, draw layers of color so thin that each one is practically transparent, and surprise me with unexpected results!

This is the magic of algorithmic art: I must surrender control to find new behaviors and patterns. Somewhere between chaos and order lies that beauty of the accidental, the unforeseen and the emergent.

Note on terminology : I use "algorithmic art" instead of the traditional "generative art" to distinguish my practice from art made with "generative AI".

/ Selected Works

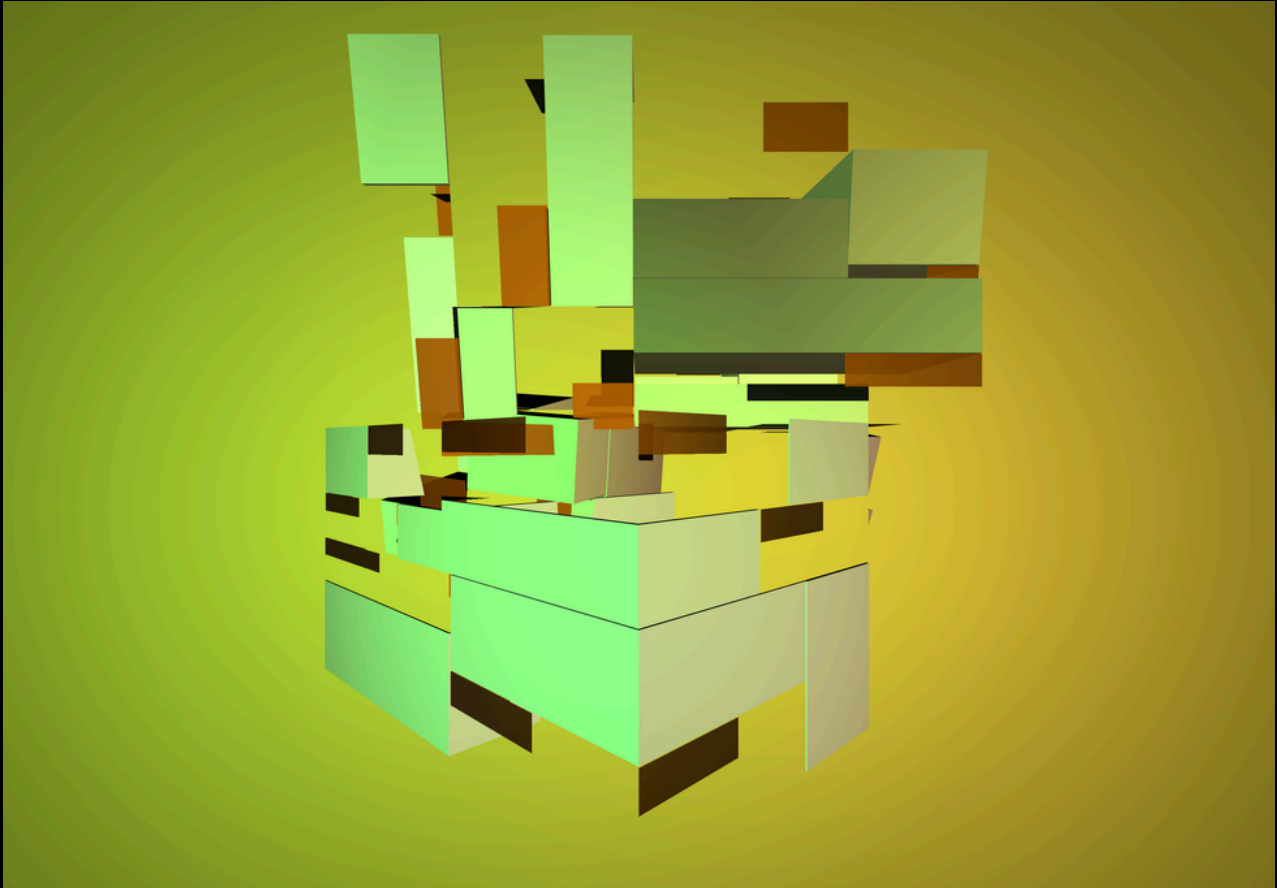

LEITMOTIV #31 - 2024 - javascript - variable size

In this algorithmic series from 2024, the simple shape of the cube is deconstructed and reconstructed, very slowly, to produce intricate arrangement of overlapping bricks. Complexity emerges from a simple protocol.

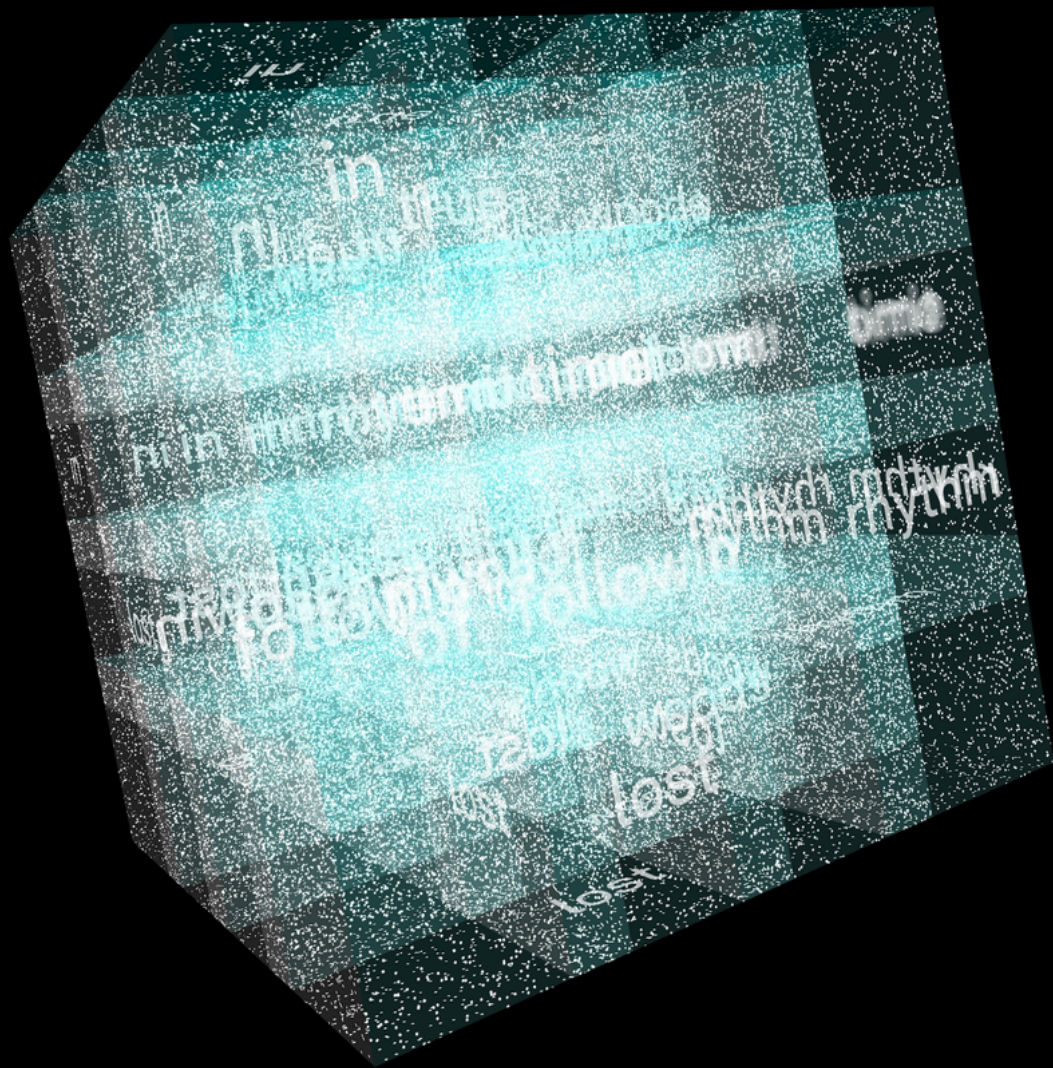

LEITMOTIV #05

Random Access Memory #36 - 2024 - javascript - variable size

Random Access Memory #54 - 2024 - javascript - variable size

The series also plays on the legibility (or lack thereof) and trustworthiness of recollections.

Arroyo Blossom #64 - 2025 - javascript - variable size

In Arroyo Blossom, an algorithmic series in collaboration with poet Æther, the theme of memory takes a more collective turn: viewers are asked to choose words that evoke their experience of generative art.

memories
myriad
vista
fractal
memories
myriad
vista

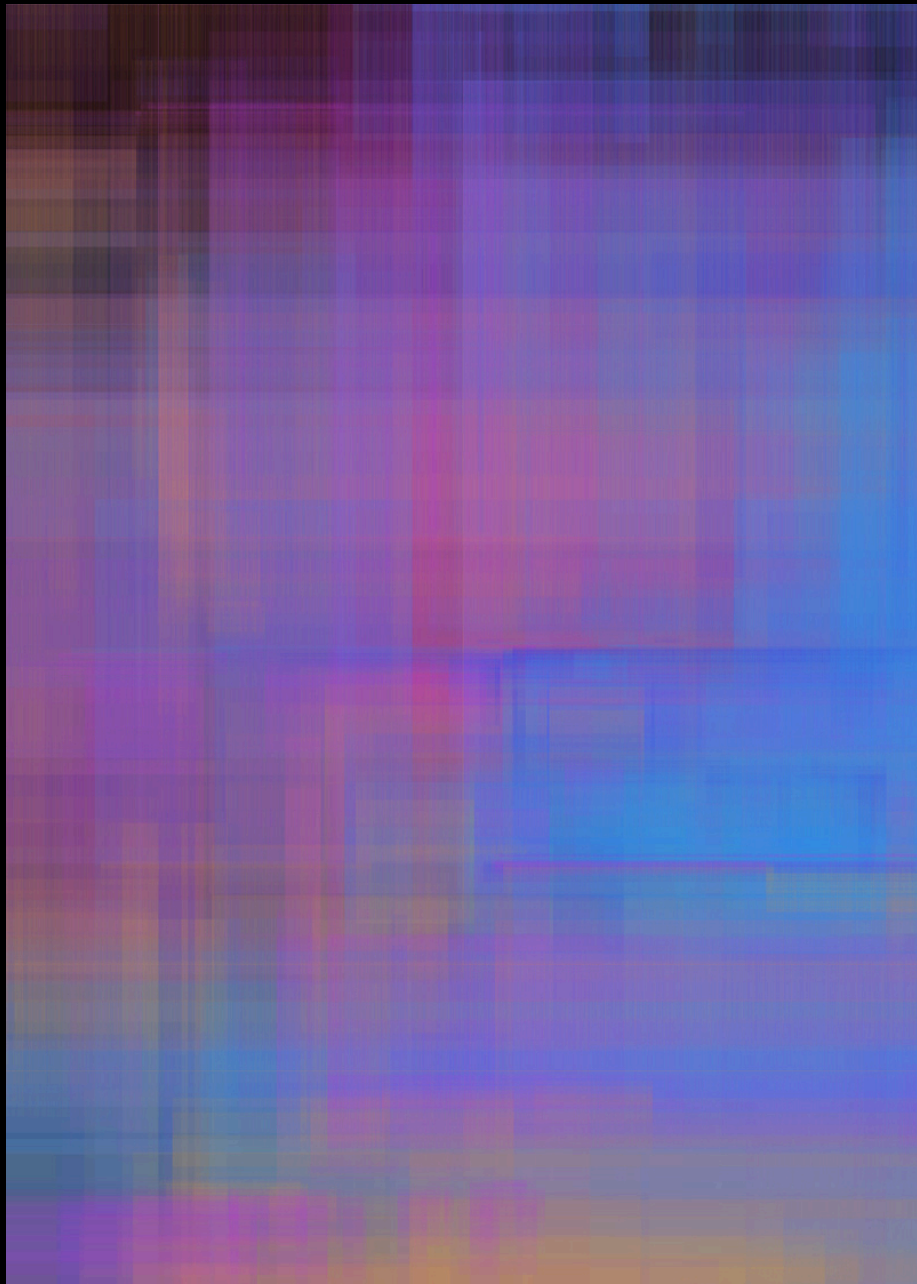

Arroyo Blossom #63

Again, complexity is addressed through simple means : the spacing of words, the number of adjacent characters using the same color, the size and overlapping of the characters.

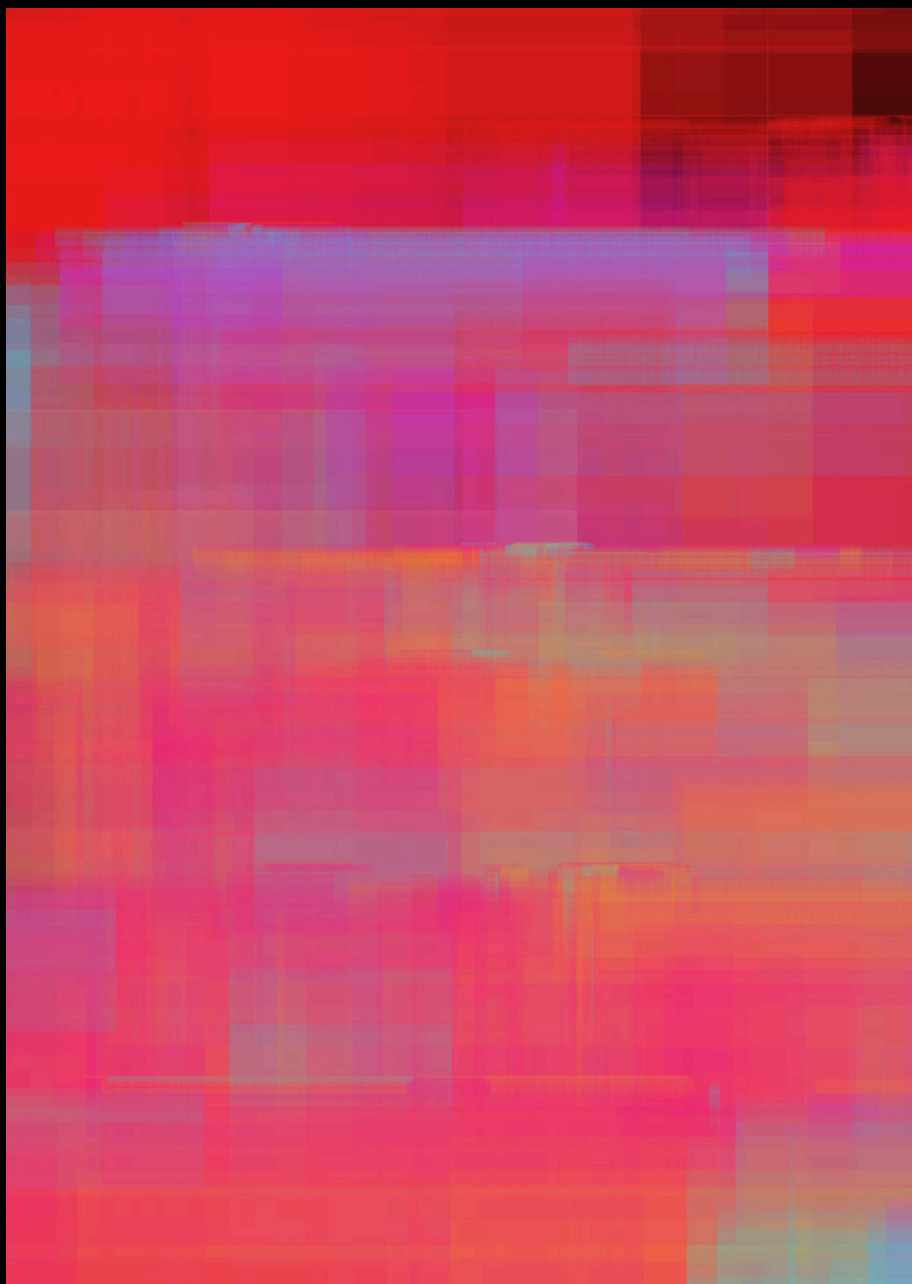

Arroyo Blossom #67

Transition #04 - 2025 - javascript - digital and print on
Hahnemühle paper 22x30"

In Transitions the complexity emerges from an accumulation of thousands of almost transparent rectangles. Memory is not within words anymore, but within the faint traces of what has been drawn.
